

Post-CO2 Laser Instructions

Wash lasered areas with **Cetaphil** 6-8 times daily.

Scrub with wet gauze to remove all of Aquaphor from previous washes and any scabbing.

Pat dry lasered areas.

Apply **Aquaphor** to lasered areas after each washing.

Skin will be red for 7-14 days and pink for about 6-8 months.

After 14 days: continue washing twice daily with re-application of Aquaphor or Cetaphil moisturizer throughout the day to prevent dryness. Sun protection with at least SPF 30 and may use on top of moisturizer.

Do not wear make-up until skin is pink and does not have any crusting.
