**14825 N. Outer Forty Road, Ste. 350, Chesterfield, Mo. 63017
636-812-4300**

Dr. Judith Gurley is a board-certified plastic surgeon of the breast, body, and face. She has a special interest in breast issues, including silicone implant replacement and breast rejuvenation with lifts and augmentation, as well as reductions and corrections of asymmetry. She is a Fellow of the American College of Surgeons and a member of the American Society of Plastic Surgeons, The American Society for Aesthetic Plastic Surgery, and the Association of Women Surgeons, among others.

Dr. Gurley's practice offers a full range of plastic surgery and medical-spa services, including breast augmentation, reduction, and lifts; face, neck, and eyelid procedures; arm and body lifts, Botox®; dermal fillers; laser hair removal, and rejuvenating laser treatments for face, neck, and chest.

"My reward is seeing my patients happy and satisfied with what they see," says Dr. Gurley. "Our newest innovation is our combined approach for skin care, utilizing Botox®, fillers, prescription treatments, and laser to help prolong a youthful complexion."

Dr. Gurley takes the time that is needed to get to know you and understand your concerns. Her caring personality and artistic eye enable

her to help you realize the possibilities of correcting or changing your body. All of this takes place in the privacy of her office with compassionate staff.

Body type, bone structure, and personal preferences are carefully considered and discussed during an initial consultation. Dr. Gurley helps you visualize expected surgical outcomes, using a personalized sketch of your body contours. Her passion for art and beauty help her design procedures and treat patients with balance and symmetry, bringing out your own natural features.

"Many things in this life we cannot change," says Dr. Gurley. "There are

a few procedures that allow us to repair deformations, rebuild that which has been removed, or modify for a more pleasing appearance. Rely on a board-certified plastic surgeon when considering plastic or reconstructive surgical options."
