Judith Gurley Plastic Surgery & Spa

Dr. Judith Gurley is a board-certified plastic surgeon of the breast, body, and face. Her passion for art and beauty help her design procedures that bring out each patient's natural features with balance and symmetry. She has a special interest in breast reconstruction, including correction of deformities, repair of stretched out breast tissue after childbirth, reduction of uncomfortably large breasts, and cosmetic enhancement of the breasts with lifts and augmentation. Dr. Gurley also recognizes there is a population of boys and men who suffer from too much breast tissue. She is well versed in the surgical correction of gynecomastia.

"As a plastic surgeon, I am interested in your health and designing a customized treatment plan that is right for you," says Dr. Gurley.

Dr. Gurley's practice offers a full range of plastic surgery and medical-spa services, including body contouring with tummy tucks, liposuction, and arm-lifts. She also has a special interest in facial rejuvenation. Using new, non-surgical instruments and techniques, she can rebuild or reconstruct the face with improved skin texture and facial contours without leaving scars. Dr. Gurley's medical spa offers finishing touches for facial health and beauty with prescription level peels, laser treatments, and other procedures.

Dr. Gurley's patients appreciate the time she takes to get to know them and understand their concerns. Her artistic eye enables her to visualize and communicate the possibilities for correcting or changing

your body. All of this takes place in the privacy of her Chesterfield office, with a compassionate and knowledgeable staff.

Always rely on a board-certified plastic surgeon when considering plastic or reconstructive surgery. Dr. Gurley is a fellow of the American College of Surgeons and a member of the American Society of Plastic Surgeons, The American Society for Aesthetic Plastic Surgery, and the Association of Women Surgeons, among others.

WHAT'S NEW?

- Fat grafting has changed the way Dr. Gurley practices. Fat taken from other areas of the body can now be used to naturally enhance the face, breasts, and buttocks to help restore volume, smooth out wrinkles, and give you a more youthful appearance.
